

Leveraging one device for print, copy, scan and fax capabilities for a lower total cost of ownership.

IBM Infoprint 1410 MFP

Highlights

- ***Provides the ability to print, copy, scan and fax from one machine***
- ***Helps lower total cost of ownership through device consolidation***
- ***Delivers output at fast print speeds for exceptional productivity***

Reducing costs and capitalizing on advanced functionality

Space and budget restrictions are prompting companies to consolidate existing equipment, including printers, copiers, scanners, and fax machines. By replacing aging office equipment with multifunction machines, businesses are able to obtain advanced functionality, as well as consolidate ongoing maintenance and supplies with a single vendor.

The IBM Infoprint® 1410 MFP is a low-cost multifunction device which includes integrated black-and-white print, copy, color scan and fax functionality. Featuring standard duplex and a small footprint, the Infoprint 1410 MFP is a high-performance device that is ideal for

small businesses and workgroups, especially those with limited space.

Featuring multifunction capabilities in one integrated device

The IBM Infoprint 1410 MFP is an all-in-one machine that is easy to install and that enables you to print, copy, scan and fax from a single device. Its integrated design can help you avoid high acquisition costs and reduce operating costs.

Consolidating devices to help lower total cost of ownership

With the Infoprint 1410 MFP, you can consolidate office devices and enable a lower total cost of ownership. By combining full-function print, copy, fax and network scan capabilities into one device, including fax-from-workstation, scan-to-e-mail and FTP, you can reduce device management time. Fewer office devices can also require less service than multiple devices supporting the same number of people. Less service needed means more money saved.

A toner cartridge, the only supply item required for the Infoprint 1410 MFP, is available in a high-yield version to help minimize costly interventions

and lost time due to supply outages. Print darkness settings can help you save as much as 50 percent on toner usage to increase the time between supply replacements which enables cost savings. Included with the Infoprint 1410 MFP, MarkVision print management software offers proactive realtime monitoring and a simple user interface to help you further lower printer management costs.

Improving productivity with fast output speeds

The Infoprint 1410 MFP is a black-and-white laser printer that prints up to 22 pages per minute (ppm)¹, so users spend less time waiting at the printer, helping to improve productivity. It also offers 300 dpi, 600 dpi and 1200 image quality resolution settings and can copy, scan and fax at the touch of a button.

IBM Infoprint 1410 MFP at a glance

Print functions

Maximum speed (up to)¹	22 ppm letter
First-page-out time¹	As fast as 10 seconds
Technology/processor	Monochrome laser / 300 MHz processor
Maximum monthly usage²	50,000 pages
Print resolution	300 dpi, 600 dpi, 1200 image quality
Memory (standard/max)	128 MB standard / 384 MB max
Paper handling	
Input capacity	350 sheets standard with 500-sheet 2nd drawer option
Output capacity	170 sheets
Printer connectivity	Ethernet 10/100BaseTX USB 2.0
Standard datastreams	PCL 6, PostScript® 3™ emulation and PPDS
Application solution	Opra Forms
Toner yield³	6,000-page-yield toner cartridge ships with printer 6,000-page-yield and 12,000-page high-yield toner cartridges available
Cost-saving features	Toner darkness settings offer up to 50% toner savings; IBM return program cartridges; standard duplex printing
Physical characteristics	16.25" (W) x 19.5" (D) x 21.25" (H)
Weight	45 lbs
Warranty	One year, next-day IBM onsite repair (upgrades are available)

¹ Exact speed varies depending on document complexity, system configuration, software application, driver and printer state.

² IBM does not recommend printing this monthly maximum on a consistent basis.

³ Assumes 5% toner coverage per page. Toner yields are provided for planning purposes and are not a guarantee of minimum life; actual yields may vary.

Relying on world-class technology and services

Wireless Ethernet can enable wireless connectivity to local area network resources including servers, printers, PCs and laptop computers.

IBM provides unmatched service and maintenance capabilities, a broad range of output solutions and a single point of contact to meet your specific requirements. And, we can link to your existing desktop management, help desk and other infrastructure services to create an integrated output environment.

IBM Infoprint 1410 MFP at a glance continued

MFP functions

Scan and document handling

First copy out time	As fast as 12 seconds
ADF (capacity/max speed) ⁴	50 sheets/16 ipm letter monochrome, 10 ipm letter color
Console type	LCD
Maximum scan size	Legal (8.5" x 14") in ADF
Input	Duplex (single pass)

Scanning capabilities

Scan file formats	JPEG, TIFF, PDF, PostScript
Type	Color and monochrome
Maximum optical resolution	600 x 600 dpi (monochrome), 600 x 300 dpi (color)
Scan destinations/archiving	FTP server, workstation, e-mail

Fax capabilities

Maximum fax resolution	400 x 400 dpi
Modem speed	33.6 Kbps
Receive fax	Yes
Send hard copy fax	Platen or automatic document feeder
Send soft copy fax	From PostScript 3 print driver at workstation
Memory send	Yes
Internal faxing (scan to FTP)	Yes
Fax-server integration	Biscom, Equisys, Om Tool, RightFax

⁴ Exact scan speed varies depending on document attributes, system configuration and user selected settings.
